Project Name	SmartLender – Applicant Credibility Prediction for Loan Approval
Maximum Marks	2 Marks

Phase of Journey	Stage 1: Apply	Stage 2: Review	Stage 3: Decision
Actions	Enters personal, financial, and loan details such as income, education, employment status, loan amount, credit history, and property area.	The system processes the application, validates the data, and predicts loan eligibility using the trained machine learning model	Views the loan prediction result (Approved/Rejected) and understands the outcome.
Touchpoint	Smart Lender web application's loan application form (predict.html).	Flask backend integrated with the trained Random Forest machine learning model.	Prediction result page (submit.html) displaying the loan approval status.
Customer Thought	"I hope I entered all my details correctly."	"Will my application be approved based on my details?"	"I'm glad my loan was approved." or "Why was my application rejected?"
Customer Feeling	Hopeful but slightly uncertain.	Hopeful but slightly uncertain.	Happy and relieved if approved; disappointed or curious if rejected.
