

Demonstration of Proposed Features

Date	15 July 2026
Team ID	*****
Project Name	SmartLender – Applicant Credibility Prediction for Loan Approval
Maximum Marks	1 Mark

This document presents the features proposed during the planning phase of the SmartLender project and indicates whether each feature was successfully implemented and demonstrated during the final project presentation.

S.No	Feature Name	Description	Demonstrated (Yes/No)	Status	Remarks
1	Home / Overview Page	Displays the project overview and provides a Start Prediction button to navigate to the application form	Yes	Implemented	Successfully demonstrated.
2	Loan Application Form	Collects applicant details including all required loan prediction features.	Yes	Implemented	User inputs validated successfully.
3	Data Preprocessing	Handles missing values, encodes categorical variables, scales data, and prepares the input for prediction.	Yes	Implemented	Successfully integrated with the prediction workflow.
4	Loan Approval Prediction	Uses the trained Random Forest machine learning model to predict loan approval status.	Yes	Implemented	Prediction generated successfully for different applicant profiles.
5	Result Page	Displays the loan approval prediction (Approved/Rejected) along with the submitted applicant details.	Yes	Implemented	Successfully demonstrated during application testing.
6	User Authentication & Database Storage	Login system and permanent storage of applicant records.	No	Pending	Planned for a future phase

Feature Implementation Summary

Metric	Value
Total Features Proposed	6
Total Features Implemented	5
Total Features Demonstrated	5
Overall Implementation Rate (%)	83%
