

Project Demo Planning

Date	15 July 2026
Team ID	*****
Project Name	SmartLender – Applicant Credibility Prediction for Loan Approval
Maximum Marks	1 Mark

This document outlines the plan for demonstrating SmartLender, covering the flow of the demo and key features to highlight.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the SmartLender project, explain the loan approval problem, and describe the objective of using Machine Learning.	0.5	M. Koteswara rao
2	Website Overview	Demonstrate the Home Page, Loan Application Form, and Result Page. Explain the purpose of each page.	2	M. Koteswara rao
3	Live Prediction Demonstration	Enter applicant details, submit the form, and display the loan approval prediction generated by the Random Forest model.	1	M. Koteswara rao
4	Technical Walkthrough	Briefly explain the project structure, app.py, HTML templates, CSS, machine learning model, and prediction workflow.	1	M. Koteswara rao
5	Conclusion & Future Enhancements	Summarize the project, discuss its benefits, future improvements, and answer evaluator questions if any.	0.5	M. Koteswara rao

Demo Flow Summary

Step	Activity	Notes
1	Introduction	Briefly explain the project objective and the need for automated loan approval prediction.
2	Home Page	Introduce the website and click the Start Prediction button.

3	Loan Application Form	Fill in the applicant details and explain the important input fields.
4	Prediction Result	Submit the form and show the loan approval prediction generated by the model.
5	Code Walkthrough	Briefly explain the Flask application (app.py), HTML templates, CSS, and the trained Random Forest model.
6	Conclusion	Summarize the project and mention future enhancements such as database integration, user authentication, and cloud deployment.
